

Membrane Switches and Dials

Screen printing mesh for the electronic industry.
 Perfect fabrics for new stencil standards in industrial environments and impressive print results.

Overview

Performance, innovation, reliability: Printing in the electronic industry

Membrane switches and dials for the automotive industry have two equally-important needs: precise color reproduction and excellent print-quality are crucial for success.

Most of the products are printed using a multiple image production process. Therefore low elongation screen printing mesh having superior dimensional stability is required.

Our offer. Your benefit:

- Technology and quality of the world's leading manufacturer
- Wide product range for all requirements from stock
- Innovative products providing maximum efficiency
- Individual support for your printing projects
- Lean, efficient production, in both stencil preparation and the printing process
- Sustainability, safety and reliability of supply to the finished printed product
- Local, world-wide cooperative partnerships with Sefar's support teams
- Increase the competitiveness of your business

Applications

Constantly under pressure – Membrane switches and keypads

- Functional layers
- Conductor paths
- Adhesive printing
- Communication interface

Keypads are in constant use every day, must withstand a lot of physical punishment and still look good and perform well. In addition, inscriptions such as signs, labels and numbers must remain clearly visible for years. For both graphical and functional elements: By using Sefar screen printing mesh you can produce membrane switches and keypads with the highest, consistent quality. Recommended: SEFAR PME and SEFAR PET 1500.

Form follows function – Dials

- Solid color
- Translucent ink
- Metallic and fluorescent
- Adhesive
- Varnish

As motorists, our eyes are mainly focused on the road but we must also be constantly aware of our speed, and thus we also look often at our tachometer. SEFAR PME and SEFAR PET 1500 screen printing mesh properties allow the precise and efficient production of easy-to-read tachometer dials so that we are able to keep our eyes on the road but easily and continuously be aware of our speed and remain accident free.

Screen Printing Mesh

SEFAR PME – The best performing screen printing mesh

SEFAR PME is the screen printing mesh for use in the industrial environment. It is based on an innovative, high modulus polyester yarn developed by Sefar having extraordinary tensile strength combined with very low and evenly-balanced elongation. SEFAR PME sets new standards in the stencil making process. Its quality printing results are hugely impressive in the most demanding and innovative printing applications.

SEFAR PET 1500 – The screen printing mesh professionals use

SEFAR PET 1500 is the best stencil carrier for an almost infinite number of
