#### Enhanced process quality: SEFAR 3A – Stretching clamps

The progressive build-up of the clamping pressure and the lifting function of the SEFAR 3A stretching system enhances its perfor- mance by reducing the reject rate. Why? The mesh can't slip out the jaws and eliminates friction between fabric and frame. This means you are able to work with faultless, evenly-stretched screens. Day after day. Another plus point: The SEFAR 3A clamps are suitable for all screen printing mesh – regardless of screen size, materials or thread count. All of this with ease of handling and quick adjustments to the next frame size.

# **Product features**

# Customer benefits

Modular single or dual-circuit

pneumatic system

Progressive build-up of the jaw

pressure

Raising and lowering function of the

#### jaws

Jaws having widths of 150 and 250

- Rapid conversion to different frame formats
  - and no restriction on frame sizes
- No slippage of the mesh from the

clamps

- Precise and kind-to-the-mesh
  - stretching process

- mm
- Stroke length of 75 or 145 mm
- Max. mesh tension of 40 N/cm
- Easy opening and closing of the clamping jaws
- Robust construction

- Simple and practical operation
  without excessive force
- Consistent reproduction of high tension values obtainable
- Pre-tensioning of the frame
  - guarantees uniform tension values
- Suitable for synthetic and wire mesh
- Minimum maintenance necessary

# SEFAR 51

The programmable single or dual circuit electronic control unit in combination with SEFAR 3A

For pneumatic stretching systems there are two possibilities to allocate the air supply: Single or dualcircuit systems – complementary alternatives for optimal, balanced tension for all types of mesh and frame sizes. Single-circuit systems are recommended for frames having side lengths up to 150 cm. For frames having sides longer than 150 cm dualcircuit systems are recommended.

#### **Product features**

- Available as single or dual circuit system
- Fully automatic tensioning process
- Programmable for up to 50 different multilevel

tensioning processes

Serial interface to SEFAR Tensocheck 100

#### **Customer benefits**

- Tensioning to precise levels
- Increased productivity and process reliability

#### **Measurement devices**

#### Everything perfectly prepared – SEFAR Tensocheck 200

SEFAR® Tensocheck 200 the electronic gauge for monitoring screen tension. Its outstanding advantages: Its excellent value for money and ease of use. Our upgraded SEFAR Tensocheck 200 offers a range of additional features that are not available in any comparable product on the market.

#### **Product features**

High accuracy: Up 29.8 N/cm the

resolution is 0.2 N/cm, over that, 0.5

N/cm

Exact readings in measuring

direction

#### **Customer benefits**

Accurate, repeatable and

documented screen tension

- User-friendly operation
- Independent monitoring of the zero

position using the glass control plate

- The highest process reliability and reproducible results
- WiFi connection allows remote control and data transfer
- Rechargeable battery via USB C connection
- High-contrast LCD color display

- Measurement unit selectable by press button (N/cm or mm)
- Adjustable automatic shutdown prevents from energy waste
- Long energy supply and easy rechargeable
- Remote control through smartphone or PC via WiFi
- CSV logging of the easurement data through smartphone or PC via WiFi
