

# Tape and Dispenser Products

These fabrics are combined using one or several adhesive layers or a dispenser tape. We provide dirt and moisture protective products, shock absorbing, surface protecting and sealing materials and shielding components.

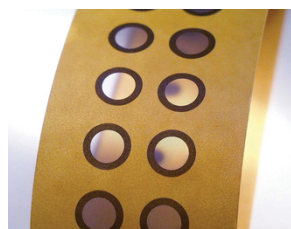

## Product Features

### Tape and Dispenser Products

These products are made by combining fabrics, foils or films with one or several adhesive layers. Alternatively a combination using a dispenser tape is also possible.

### Product forms

- The pieces are cold- or laser-stamped into single rings or customer specific shapes
- Laser stamped parts can be supplied having a max. dimension of 245 x 245 mm
- Cold stamped parts can be supplied having a max. dimension of 120 x 120 mm
- Adhesive components can be supplied having a one- or double-sided adhesive layer
- Can also be supplied on a dispenser tape without any adhesive backing

## Making-up

- Tape and dispenser products are supplied on a backing tape
- Wound onto cores of 3" or 6" diameter (76.2mm/152.4 mm)
- Delivery of goods in bulk possible

## Packaging / labeling

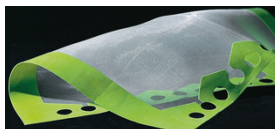

- Rolls containing semi-finished parts are packed into PE bags which are closed by welding
- The label contains the following information:
  - manufacturer
  - material
  - dimensions (diameter in mm - length in m) or number of pieces
  - manufacturing date
  - order number

## Your Benefits

- Quick and efficient joining to any housing or other component  
(one- or double-sided adhesive layer)
- Easy handling and transport in automated assembly systems (dispenser tape)
- Almost unlimited spectrum of shapes (various technologies)
- Traceability (label)
- Broad application range:
  - Automotive
  - Electronics
  - Household and industrial appliances
  - Loudspeakers and microphones
  - Medical
  - Telecommunications
  - Other applications
